

BECAUSE DATA IN NEED IS DATA INDEED

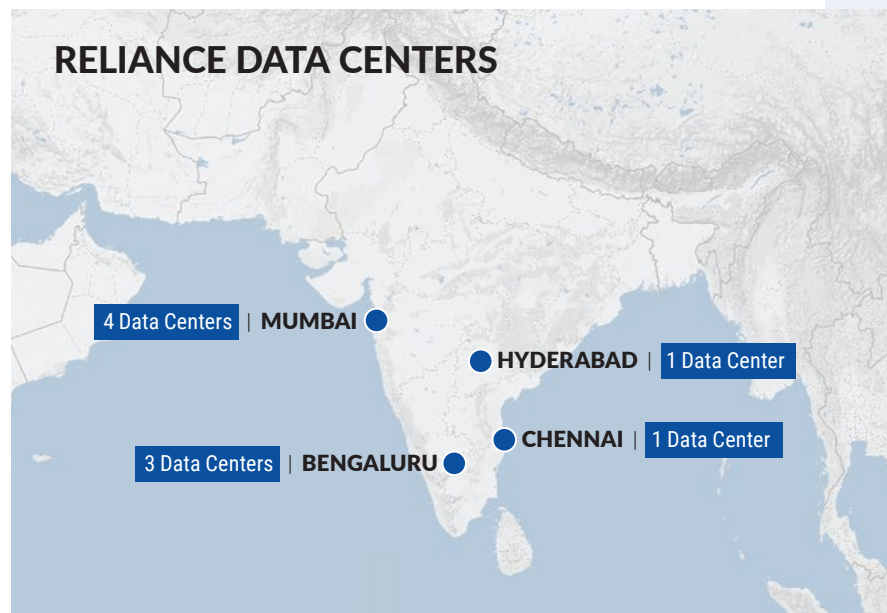

In the data-driven world, just possessing the right data is not enough. It should be available when it's needed. We offer Colocation services at our world-class data centers to help you host your servers & IT equipment in a power-efficient secure environment so that your data stays protected and is available to your users whenever and wherever they need it.

When we pioneered third-party data center services in India with our first data center at Mumbai in 2002, our vision of building and operating world-class data centers in the country found concrete shape. Over the years, we have built infrastructure and expertise, and are today a leading provider of Data Center services in the Asia-Pacific region with nine data centers in India that exceed Tier 3 specifications.

Drawing on our rich experience of building data centers for us as well as for others, we have ensured that each of our data centers stands firm on the pillars of safety, efficiency, scalability and reliability.

RELIANCE DATA CENTERS

When you avail Colocation at any of our data centers, you also have the advantage of ready access to a host of IT Shared IT Infrastructure offerings and IT Managed Services enabled by cutting-edge tools and our team of experienced professionals.

SHARED IT INFRASTRUCTURE

 Virtual Infrastructure Management

COLOCATION AND BEYOND

KEY FEATURES

- Multiple configurations available for varying business needs: Rack Unit (U), Half Rack, Full Rack
- Pay-Per-Use (PPU) model also available: Customers pay only for consumed power (and not the rated power)
- Capable of meeting large power requirements
- Operational excellence reflected by certifications like ISO 9001, ISO 20001, ISO 27001, ISO 50001, ISO 18001, Six Sigma
- Data centers at the heart of a domestic network that connects to other major data centers in the country, offers direct connectivity to Public Clouds and is seamlessly integrated with a widespread global network
- Carrier-neutral data center facilities with multiple ISP presence
- Option of setting up your own "office" within or in close proximity to data centers for hands-on management of your hosted IT infrastructure
- Full suite of Managed Services to help you get the best Colocation benefits

KEY BENEFITS

- Helps you derive maximum benefits from your Cloud strategy (whether Private, Hybrid or Public Cloud) by bringing your IT applications to the nerve centers of a network with an expansive domestic and international footprint connecting to major data centers, content hubs and Public Clouds
- Facilitates seamless delivery of content for OTT/content players hosted with us by making the entire universe of Indian Internet users available with minimal-hop access

To give your data the advantage of a world-class data center, talk to our Colocation experts today.
